

Plug in the Kids - PROJECT 1

Begin NOW wherever computers are connected. Do the plug-in with many small projects in the beginning, with single classes and one teacher.

Beam Afghanistan - PROJECT 2

The satellites that pass above Afghanistan every day beam many things of value down to businesses, government, military, politicians and even bad guys. *But what about the children?* Satellite companies and the military should beam the Internet to every area of Afghanistan, for the children.

Rollout HandLearners PROJECT 3

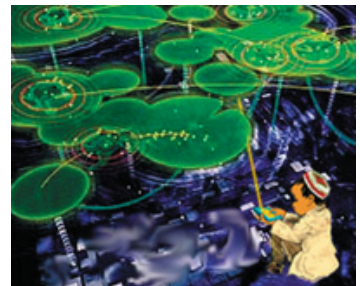

Get existing non-Internet connected HandLearners to the Kids NOW: PDAs like Palms and learning laptops like Radio Shack's. As the technology rolls out, the simple, self-contained HandLearners we have now will be replaced with mobile devices that are con-

Grow WI-FI PROJECT 4

Find companies that will supply 50 base stations and 1000 wireless laptops to establish local area networked schools. Do this many times to cause overlapping networks.

WI-FI is happening spontaneously through commercial local networks. Teachers and students should have wireless computers so they can use this free
